# Hair Extensions Post Care

## Washing

- Do not shampoo hair for at least 3 days after installation.
- I agree to install and use a showerhead water filter. Recommended: Jolie
- It is recommended that you (using the SalonX Extension Brush) gently brush and take out any tangles before washing your hair. Always hold the hair with one hand as you brush starting at the bottom and working your way to the top.
- Shampoo hair in a gentle manner, following the direction of hair flow.
- Only use the Amika, K18 or Bhave, gently shampoo with your head tilted back (not forward) gently squeezing the shampoo from top/scalp to bottom of the hair. Do not massage/scrub the hair extensions, it will cause matting and tangling. Rinse with lukewarm, not hot water, squeeze out excess water, and wrap hair in a towel. Do not use a scrubbing motion to dry the hair. Always dry the bonds to help prevent any breakdown.
- Condition hair using one of the brands matched conditioner from just below the tip of the extension to the ends.
- Rinse with cold water and follow up with a leave in mask from the matched brand. Do not mix brands.
- Everyday, use a small amount of hair oil. Spray two misting sprays of hair oils on your palms and run through your extensions. Do this on a daily basis to keep extensions moisturized.

## Brushing & Styling

- Use the SalonX Extension Brush to detangle the hair starting at the ends and working your way up to the scalp.
- Dry hair 80% to 90% before using an extension brush to finish your blow-dry style.
- Use the recommended hair extension brush (SalonX Boar Bristle Extension Brush)
- Do not put direct stress on the bonds. When using a blow dryer, flat irons, etc, do not apply heat directly to the bonds.
- Before blow-drying, separate/detangle the hair using a wide tooth comb. Work the hair starting at the ends. When drying do not apply heat directly to the hair extension bonds. (Note: When using flat irons, hot rollers or curling irons keep a safe distance away from the bonds.) Always use a heat protectant spray before ironing, curling or blow drying. Never exceed 380 degrees on any hot tool.

## Other Maintenance Recommendations

- Run fingers through hair daily making sure the bonds stay separated.
- Never go to bed with wet hair. Always make sure your hair is dry and tied back in a loose ponytail before going to sleep.
- To prevent tangling, never go to bed with wet hair. Dry hair and tie back in a loose ponytail or loosely braided.
- Salt and chlorinated water can break down the bonds of your hair extensions. To reduce the effects, wash hair immediately after swimming and immediately use the shampoo, conditioner and mask to reset the PH balance. Follow the directions for drying the hair and bonds.
- Expect to lose some extension strands, this is normal.
- The average person loses 100 of their own hairs per day. Over a period of time, you will accumulate a small amount of naturally released hair in the bonds. This is normal. Regular gentle brushing will reduce the risk of matting and tangling.
